98 The fascination of Audi

The equipment for the vehicles illustrated in the Fascination section can be found on page 97.
The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

IN A 5150

In an instant, form becomes fascination.

A brief moment. The blink of an eye. Sometimes that is as long as it takes to provoke enthusiasm. One glance at the Audi A5 Sportback is enough to sense that this is one of those moments. A coupé – completely re-interpreted. And a character which lets you discover that each moment is special from the very first metres.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

A5

Audi A5 Sportback

What kind of vehicle is this Audi A5 Sportback? A coupé? An Avant? This vehicle does not fit into familiar categories.
It defines a class of its own – a five-door coupé. From the elongated, three-dimensionally carved bonnet to the rear, the design echoes the classic form of a two-door. The sharp distinctive lines convey vehicle expression and stance. The flat roof is stretched elegantly over the frameless doors and a sporty shoulder line accentuates the large wheels. Short overhangs and a longer wheelbase create additional dynamics.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

The elegant yet powerful roofline of the Audi A5 Sportback is rounded off by its smoothly accentuated rear. The redesigned rear lights are particularly fascinating: they are the optical link between the shoulder line at the side and the edge of the bumper. The horizontal lines of the rear bumper accentuate the decisiveness of the design, while the diffuser insert in a contrasting colour ensures increased dynamics. The front fog lights have been given a new design; they are enclosed by a black high-gloss blade. The optional xenon headlights with integrated LED daytime running light strip are a special eye-catcher. The newly interpreted Singleframe with its sculptural structure makes the vehicle look more self-confident, while the elegant lines of the bonnet make the car lighter and sportier.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

IN A 5150

It only takes a millisecond for a normal driving situation to become a challenge. The best option is to recognise dangerous situations early and therefore avoid them as far as possible. To this end, the A5 Sportback has extensive assistance systems. On request, Audi active lane assist for example, which warns the driver if the vehicle is inadvertently drifting out of lane and gently intervenes in the steering if necessary, while the optional Audi side assist* monitors the areas to the left, right and behind the vehicle and issues a warning during lane changing if there is a vehicle in the direct vicinity in the adjacent lane.

Audi drive select lets you drive according to your mood – comfortable or sporty as you prefer. On request, the dynamic steering* can be ordered with the system; this adapts to the respective mode selected and ensures even smoother running or faster implementation of your steering commands.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards. *For information on when this feature will be available, please contact your Audi partner.

IN A 5150

Each new kilometre proves the performance of the Audi A5 Sportback and makes each drive an exciting experience. There is a wide range of powerful and torquey engines available. All the petrol engines use the economical TFSI® technology and are among the most economical and cleanest injection engines currently available world-wide. The diesel engines also combine sportiness and efficiency. Thanks to TDI technology, they unite high torque forces and low fuel consumption.

The quattro® permanent all-wheel drive sets standards in agility with wheel-selective torque distribution and self-locking centre differential. The system transfers the driving force dynamically and asymmetrically to all four wheels in accordance with the situation – for outstanding traction. On request, you can experience even more precise cornering with the optional quattro with sports differential. The new standard electromechanical power steering works depending on the speed and ensures greater steering precision and comfort. In addition, it only requires fuel if you actively request steering support.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

D
IN A 5150

Slim optional xenon headlights with a LED daytime running light strip and large air inlets give the front of your A5 its typically impressive appearance. The brake light integrated into the tailgate emphasises the aesthetic design of the vehicle. Furthermore, its LED technology also reacts more quickly than standard lamps, giving following vehicles more warning time when the car brakes.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

The interior radiates elegance and sportiness. The architecture is harmonious and creates a lively atmosphere. Selected materials emphasise the high quality of workmanship, which you will see and above all feel.

New steering wheels, colours and chrome applications emphasise this feeling. The standard leather-covered sports steering wheel in 3-spoke design provides a good grip, as does the ergonomically shaped gear or selection lever knob, which is also leather-covered.

The optional MMI® navigation plus has been enhanced. Operation is intuitive via the MMI® button with integrated joystick or voice control. MMI navigation plus features include a high-quality 7-inch colour display with 3D map representation and a hard drive for your music and media data. In conjunction with the Bluetooth car phone online, you even have a separate WiFi hotspot available. In addition, you can use numerous Audi connect services. More information about these features can be found on page 43 and from page 78 in the infotainment and Audi connect sections.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

You get into a coupé – and are amazed by the generous amount of space in the Audi A5 Sportback. Experience the dimensions and superb details of the interior, with its well thought-out design. Four or an optional five seats offer comfort and strong lateral support. On request, you can also choose the ventilated and heated climate-controlled comfort seats in the front. New seat covers add diversity to the interior, and the Fine Nappa leather offers even more seating comfort. New applications make the interior even more elegant: you can decide between high-quality plastic in a Reflex finish, aluminium or refined wood types.

Unusually roomy even in the back: for relaxed travelling even on long journeys. The generous luggage compartment with a loading width of 1,000 mm is extremely variable. The asymmetrical rear seat can be split and folded down to allow the loading volume to be extended quickly from 480 to 1,283 litres. The optional through-load facility with removable ski/snowboard bag facilitates the stowing of longer objects, so that you can look forward to your next transport in a relaxed manner.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

IN A 5015

Sportiness needs no grand words, it can be summed up in one letter: S.

The S emblem. Many impressive vehicles have been created by Audi bearing this emblem. A tradition that is seamlessly continued with the Audi S5 Sportback.

With an output of 245 kW, the powerful and compact V6 TFSI engine delivers intense driving experiences. Innovations like quattro® with self-locking centre differential and wheel-selective torque distribution make this an exceptional vehicle.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

S5

Audi S5 Sportback

The engine – the heart of the Audi S5 Sportback. The torque and acceleration will already impress in the first few metres. The 3.0 TFSI V6 spontaneously comes to life, six turbocharged cylinders release 245 kW of power. The TFSI® technology ensures you make progress not only more quickly, but also more efficiently. The displacement of less than 3 litres makes the power unit light and sporty and generates 440 Nm, allowing you to accelerate to up to 250 km/h (limited). The stiff suspension of the S sports suspension presses the S5 Sportback flat to the road, and the quattro® permanent all-wheel drive ensures outstanding traction and precise grip.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

Signalling superiority: the newly interpreted Platinum grey S-Singleframe with sculptural chrome braces and S5 logo. S-specific bumpers emphasise the sporty attributes of the vehicle, as do the redesigned air inlets. Xenon headlights with LED daytime running light strip lend the Audi S5 Sportback an unmistakable look.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

IN A 5015

IN A 5015

Generously sized wheels such as the optional 19-inch cast aluminium wheels in 5-parallel-spoke star design and body-coloured sill strips give the S5 Sportback an overall athletic appearance. The front brake callipers with S5 logo look exclusive and are ready to deliver top performance on demand. At the rear, newly designed lights using LED technology are a real eye-catcher: they combine the dynamic side of the vehicle with the clearly defined rear end. A dual-branch exhaust system with four oval tail-pipes and a diffuser with an aluminium-look blade round off the striking appearance of the S5 Sportback.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

Conveying an authentic racing feel: the leather-covered multifunction sports steering wheel in 3-spoke design with aluminium-look shift paddles. The interior is generously comfortable, the headlining in black or lunar silver creates a dynamic tension. The optional S sports seats, front, with S5 embossing, seat heaters, front and electric seat adjustment offer excellent support.

The special S line details of the interior underline the sporty character of the vehicle: these include new chrome applications or inlays in Matt brushed aluminium, Carbon Atlas, Stainless steel mesh, Fine birch wood grey or Piano finish black. Door sill trims with aluminium inlays and S5 logo round off the overall high-quality image.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

The engine management system calculates the injection quantity and ignition timing according to how much power the driver wants. In normal operation the injection pressure is between 30 and 120 bar.

Fully electronic coolant regulation

Power train with reduced friction losses

Dual FSI/MPI injection system

Audi valvelift system
and double camshaft adjustment

Cylinder head
with integrated exhaust-gas cooling

1.8 TFSI engine

Many hours of development. Thousands of miles of testing.
And for what reason?

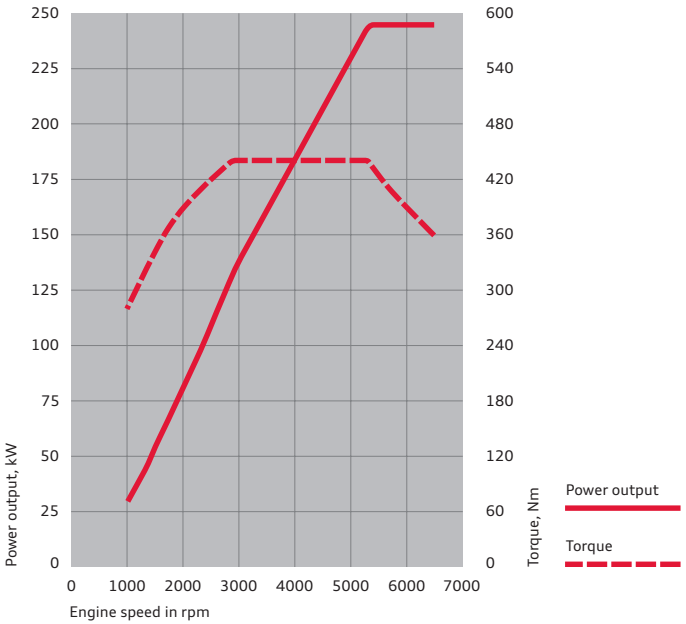
In just a few seconds you will understand why.

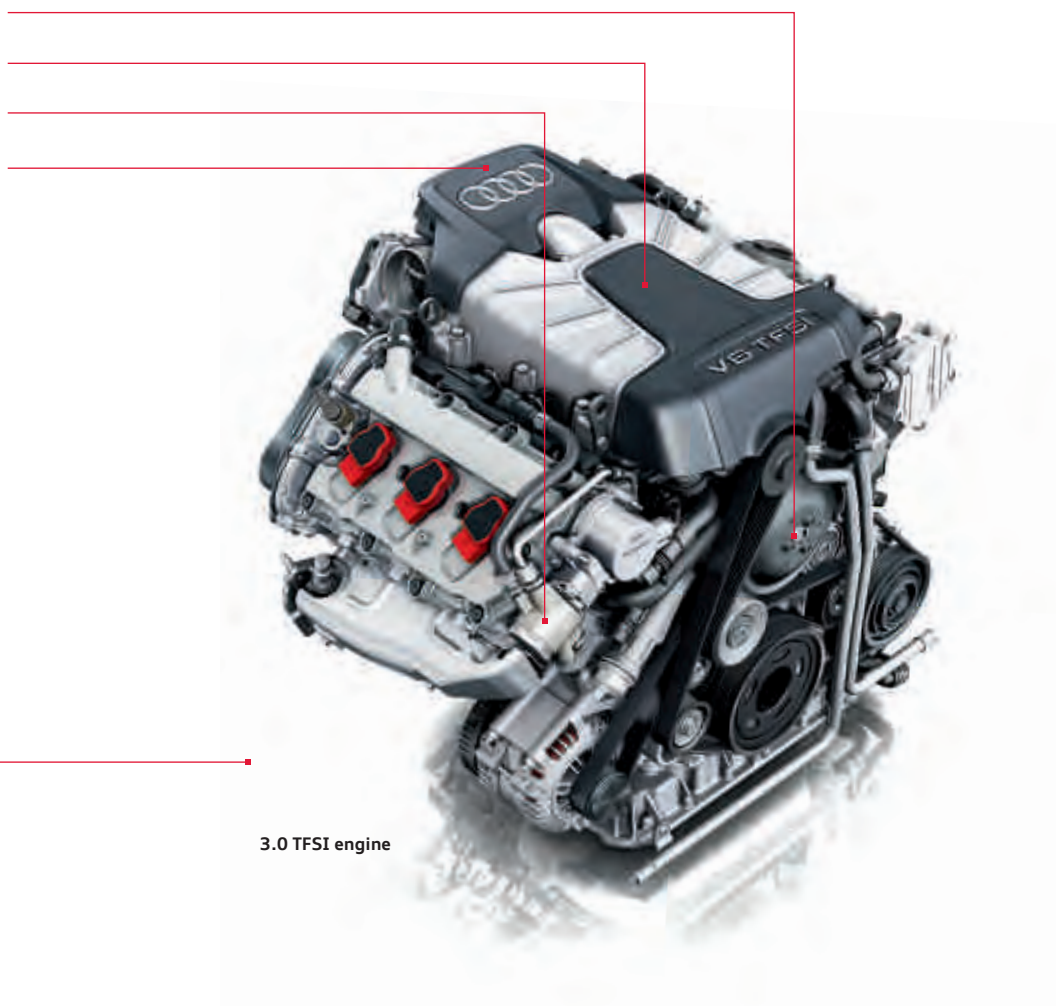
TFSI® technology is employed in the A5 Sportback. What's special about that is: it combines the advantages of FSI® with a supercharging that ensures even better power distribution. The two TFSI engines you have available are all equipped with the economic start-stop system and it goes without saying that they comply with the EU5 emission standard.

The 1.8 TFSI has 125 kW of power and a maximum torque of 320 Nm. And yet it is one of the most fuel-efficient engines of its class: in the ideal case, consumption is as low as 5.8 l per 100 km with manual transmission. It accelerates from 0 to 100 km/h in 8.2 seconds. The powerful 2.0 TFSI engine and thereby 155 kW will have you sprinting from 0 to 100 km/h in 6.6 seconds.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

Engine performance curve V6 TFSI quattro





3.0 TFSI engine

S engine:

More dynamics. More power. Completely S.

Just like the A5 Sportback, the S5 Sportback has efficient TFSI® technology. It has a 3.0 TFSI V6 engine that generates a powerful 245 kW. An innovative mechanically-driven supercharger system with charge air intercooler is employed here and turns the 6-cylinder engine into a compact powerhouse with moderate fuel consumption. This is assisted by the start-stop system that switches the engine off automatically in different standstill situations, and switches it on again when the brake is released. The S5 Sportback is exclusively available with the fast 7-speed double clutch S tronic and quattro® permanent all-wheel drive.

It is not just the peak torque of 440 Nm, also impressive is the torque curve, with at least 90 % of the maximum torque being available across a speed range of 2,200 to 5,900 rpm. Thanks to its spontaneous responsiveness and exceptional power delivery across the entire speed range, the 6-cylinder engine promotes a particularly dynamic driving style. That way, it accelerates accelerates the S5 Sportback from 0 to 100 km/h in 5.4 seconds.

TDI: start a revolution.
And keep repeating it.

The Audi R18 TDI

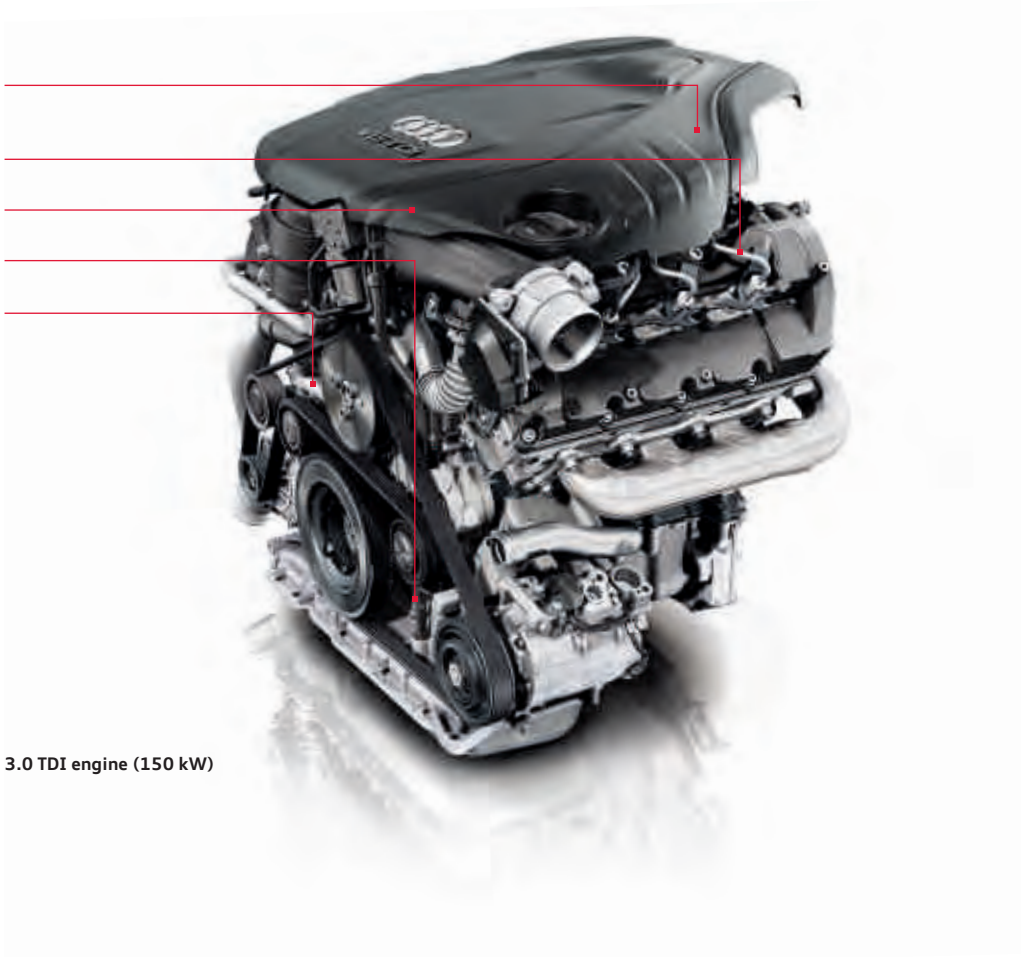
Exhaust-gas turbocharger with optimised adjustable turbine geometry

2,000 bar high-pressure injection system

Engine with reduced friction

Pressure-regulated oil pump

Innovative thermal management with separate cooling system for engine block/cylinder head



3.0 TDI engine (150 kW)

The piezo injectors open and close in fractions of a millisecond and inject fuel several times into the combustion chamber at pressures of up to 2,000 bar. In some cases, an injection process can involve the injection of the tiniest of amounts weighing less than a thousandth of a gram.

Pre-injection results in a "gentle" combustion process and consequently excellent combustion acoustics and agreeable engine running characteristics.

One in every two Audi cars sold today is a diesel. What sounds perfectly normal now was cause for huge excitement 20 years ago, when Audi revolutionised the market with the first 2.5 litre TDI engine. Since then, developments such as common rail technology have made TDI even more efficient. Piezo injectors ensure the fuel is finely and precisely distributed. Consequently, since the first TDI, the engines have become more economical, whilst specific output has increased. So it was only logical that a diesel car should then enter the world of motorsport. And successfully too: in 2006, Audi was the first car maker to win the Le Mans 24 Hours with a diesel-powered race car, the Audi R10 TDI – and then went on to repeat this victory several times over, most recently in 2011.

Powerful TDI engines are available for the Audi A5 Sportback, which are equipped with intelligent common rail technology and the standard start-stop system. The 2.0 TDI with 130 kW and 6-speed manual transmission emits an average of 122 g CO_2/100 km and is also available with the convenient multitronic system. The 3.0 TDI with 150 kW is new, and one of the most efficient six-cylinder engines in the world currently available. The top-of-the-range engine is the 3.0 TDI with 180 kW. It accelerates you with a torque of 500 Nm to 100 km/h in just 5.9 seconds.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

Why do the Audi A5 and S5 Sportback suit you so well? Because they adapt themselves to you so well.

Audi drive select.

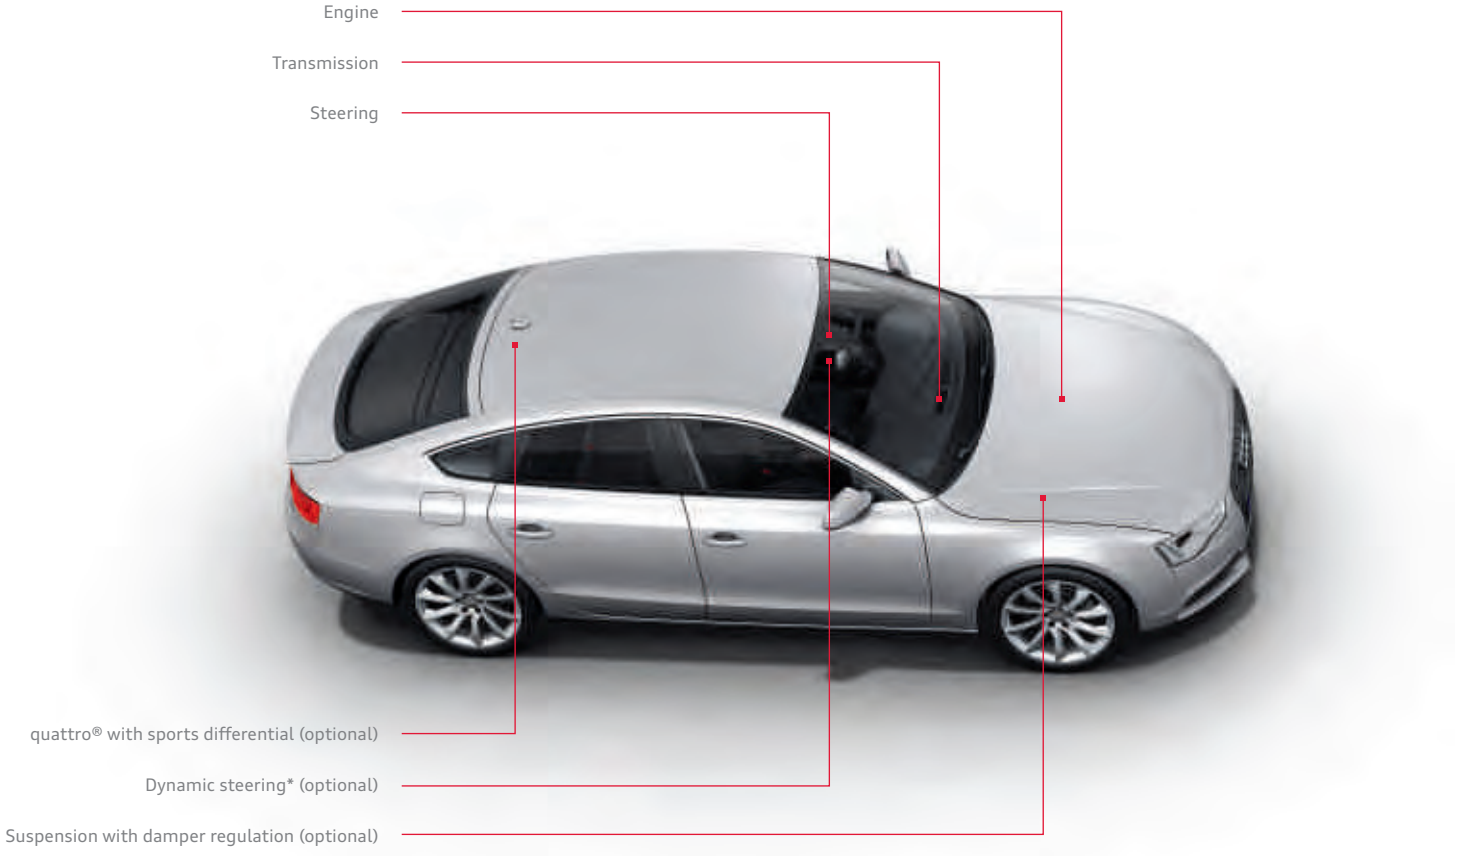
individual

comfort

dynamic

auto

efficiency



Everybody defines driving dynamics differently. We define it like this: drive exactly how you feel. With the optional Audi drive select, you can influence individual vehicle components at the push of a button and so change the character of your Audi.

You have up to five modes available: efficiency, comfort, dynamic, auto and, in conjunction with one of the optional MMI® navigation systems, individual mode, allowing you to determine yourself how the associated vehicle components should behave. The comfort mode is especially suitable for providing the most relaxed driving possible on long journeys. The auto mode offers a generally comfortable yet sporty driving experience. For particularly sporty driving, for example on winding roads, there is the dynamic mode. The efficiency mode, however, allows consumption-improved driving. As an integral part of Audi drive select, it is characterised by a changed shift program and more energy-efficient operation. In every mode, the vehicle adjustments depend on the equipment present. Audi drive select affects the engine, transmission and steering as standard. In addition, you can influence the suspension with damper regulation, the dynamic steering* and the quattro® with sports differential among other features – if available. The engine and gears react more spontaneously or in a more balanced manner to movements of the accelerator, depending on the mode chosen. Moreover, the engine speeds at which gear changes take place are varied in models with automatic transmission – in dynamic mode, they only happen at higher engine speeds, while in comfort mode they take place at lower ones. The steering can also be adapted to the driving situation, from sporty and firm to comfortable. quattro with sports differential distributes the drive force variably to the rear axle to attain a high level of agility and acceleration performance while cornering.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards. *For information on when this feature will be available, please contact your Audi partner.

With quattro® we created one of the best all-wheel drive systems in the world.

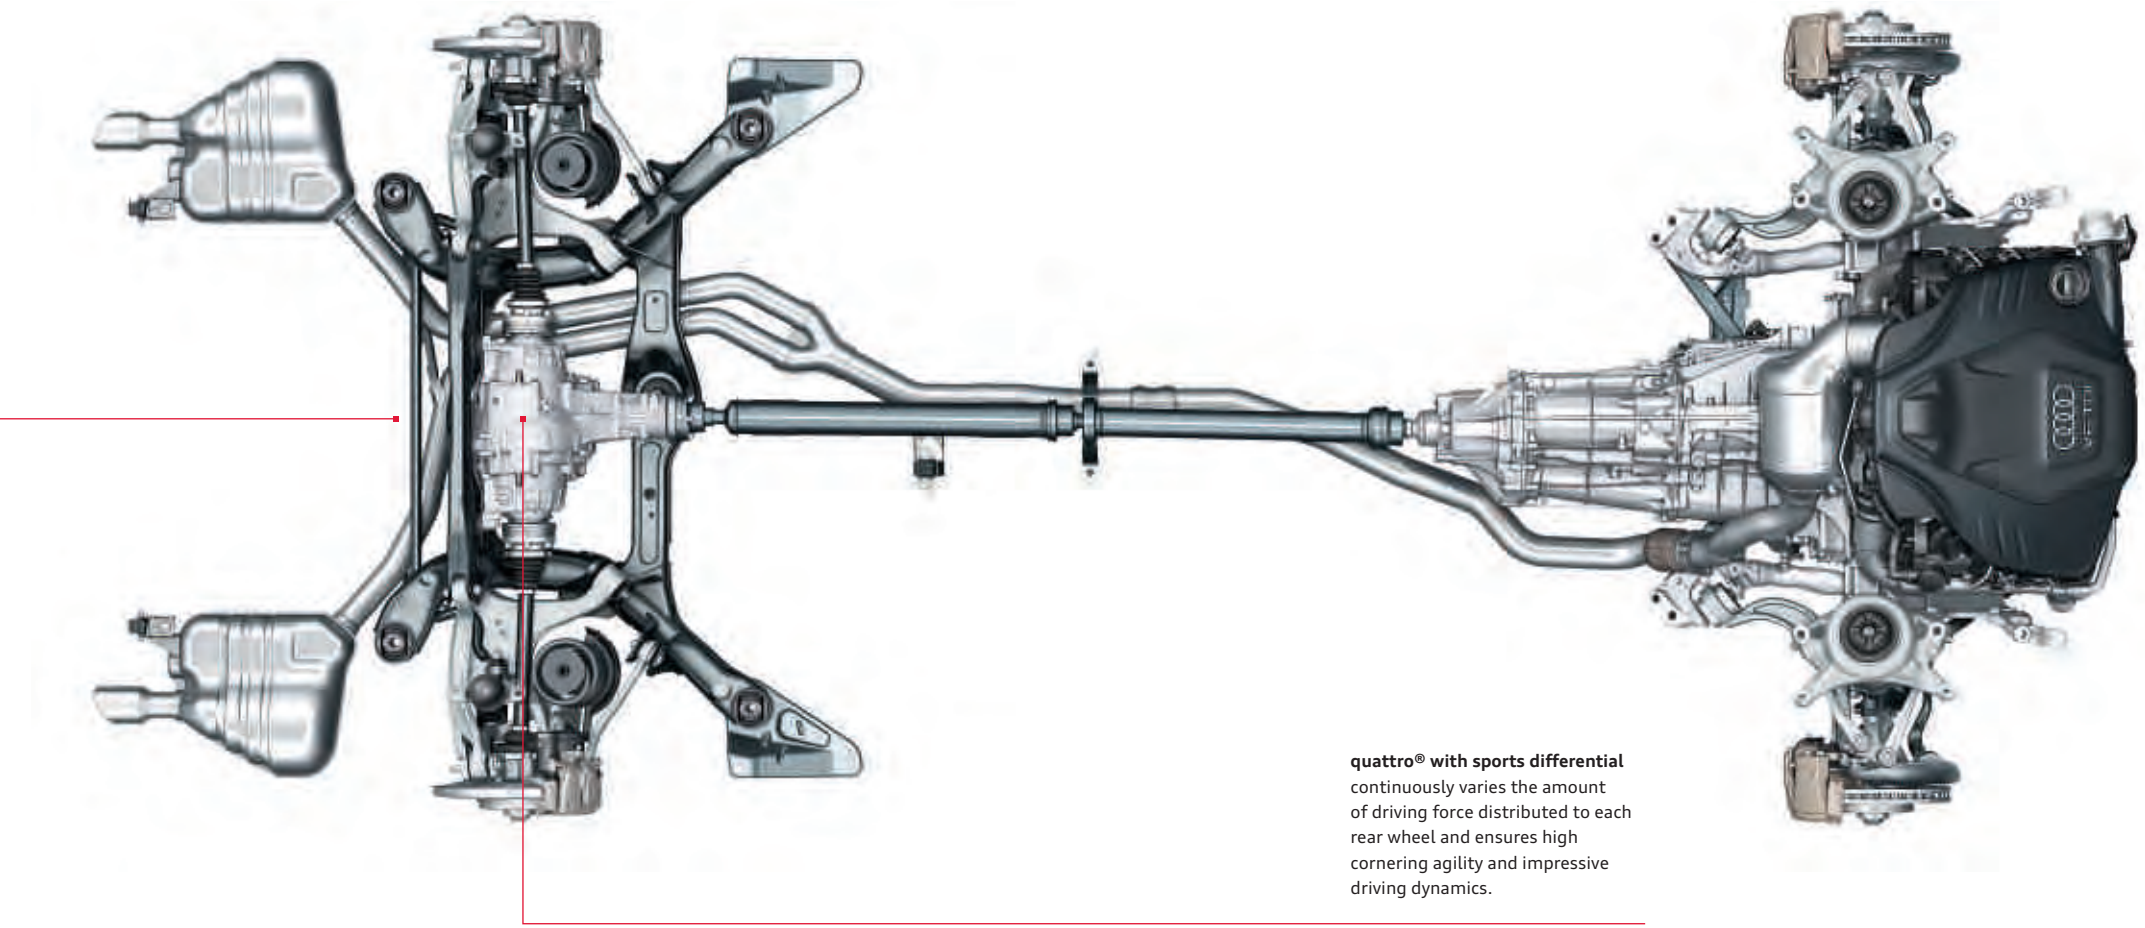
Of course, that was not enough for us.

quattro® is a permanent all-wheel drive system. If the wheels on one axle of the vehicle lose grip on the road and threaten to spin, then the power is transferred to the other axle – automatically and permanently distributed through the centre differential. The basic distribution is 40 : 60 – 40 % of the power comes from the front axle, 60 % from the rear. The benefit is better traction during acceleration and improved safety due to exceptional grip. So much for the technology. But what makes quattro unique is really the driving feel. “As if you are stuck to the road,” some customers say. We put it like this: quattro gives you a better feel for the road and thus more safety.

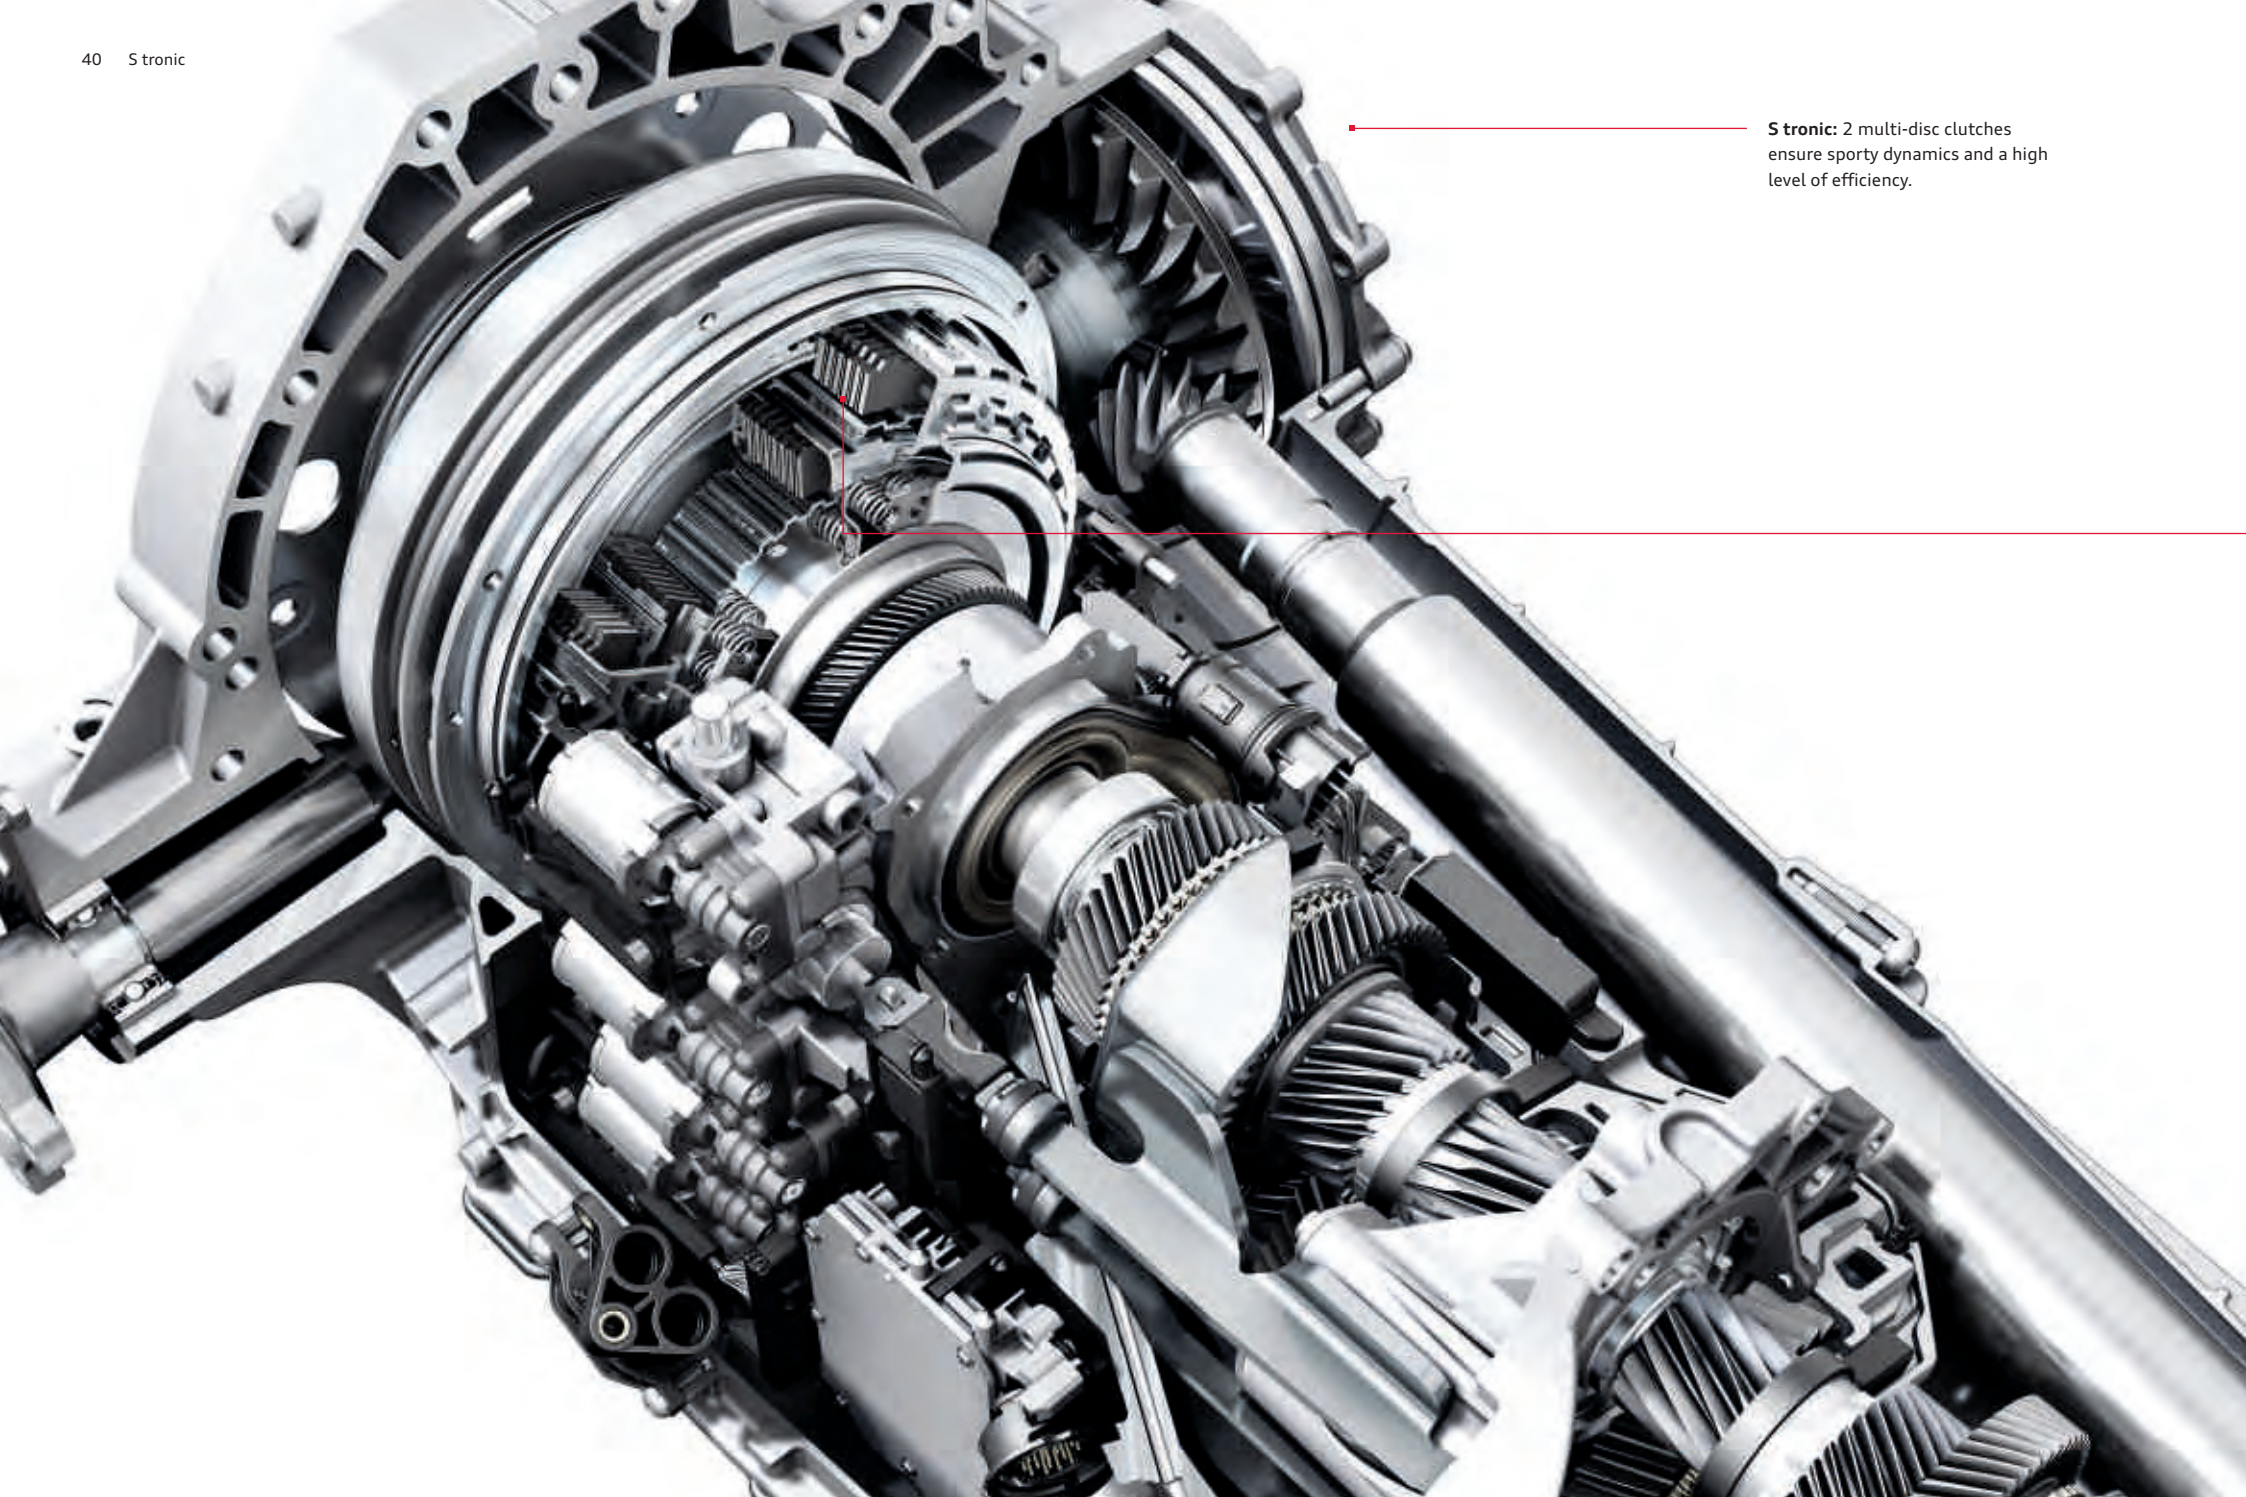
The optional quattro® with sports differential further reinforces this unmistakeable quattro feeling. Vehicles tend to experience understeer when steering or driving into corners. This is a normal physical process: a moving object opposes a change in direction. The elastic tyres and the suspension mounts tense up until the new direction has been adopted. When accelerating into a corner, the load on the front axle is reduced and it therefore transfers less lateral force to the tyres – the vehicle understeers. With the sports differential on the rear axle, the tendency to understeer is largely counteracted.

This is because the quattro rear axle differential has been extended left and right by a clutch system with two gear levels. They ensure that the individual wheels on the rear axle receive different levels of torque. The clutches are activated by an electro-hydraulic actuator. Depending, for example, on the steering angle, lateral acceleration, yaw angle and driving speed, the system calculates the right distribution of wheel torque for any driving situation. In this way the power is specifically channelled to the outer rear wheel, when steering or accelerating into a corner. The effect: the vehicle is virtually pressed into the corner and follows the angle of the front wheels. The variable left and right driving forces also help stabilise the steering and the usual steering corrections are hardly necessary.

The fuel consumption and CO_2 emission figures can be found on page 88.



quattro® with sports differential continuously varies the amount of driving force distributed to each rear wheel and ensures high cornering agility and impressive driving dynamics.



S tronic: 2 multi-disc clutches ensure sporty dynamics and a high level of efficiency.

What is the benefit of two clutches?

A double saving: time and energy.

The 7-speed dual clutch transmission enables rapid gear shifting with hardly any perceptible break in propulsive power and is therefore particularly efficient.

As long ago as 1985, Walter Röhrl tested this technology in the Sport quattro S1 – and was suitably impressed. Audi drivers share his enthusiasm to this day, because the modern S tronic changes gear in a flash. To do this, two multi-plate clutches serve the different gears. One large clutch transfers the torque via a solid drive shaft to the gearwheels of the odd-numbered gears. A second clutch serves the even-numbered gears via a hollow shaft. Both parts of the transmission are permanently active, although there is only ever one actively connected to the engine via a closed clutch. For example, when the driver accelerates in third gear, the second part of the transmission is already engaged in fourth gear. The gear change happens very quickly through the change of clutches – the first clutch opens, whilst the second one closes. The gear change only lasts a few hundredths of a second and is completed with virtually no interruption in the power flow. It runs so smoothly and comfortably that the driver barely notices it.

It does not matter whether the driver chooses the fully automatic modes with the programs D (Drive) or S (Sport) or, for example, changes gear manually with the optional shift paddles – the gear change feels precise and extremely sportive. Even with all of this dynamic technology, the S tronic still remains very efficient. Due to its high level of efficiency, it helps to reduce both fuel consumption and emissions.

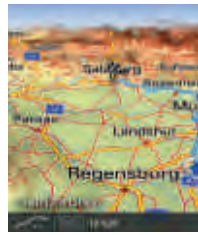
The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

Radio: the integrated radio receiver is set up for VHF, LW and MW and optionally transmits digital radio with a continually updated station list.

Media: display of available media sources such as the jukebox, inserted SDHC cards, Audi music interface or CDs and DVDs; display of optional TV tuners

Telephone/Bluetooth: the optionally available fitting for mobile phone (Bluetooth) and Bluetooth car phone online has a selection screen containing call lists, directory and selection interface as the start-up setting.

Car: this function allows the direct control of driver assistance systems, vehicle settings, climate control and service functions.



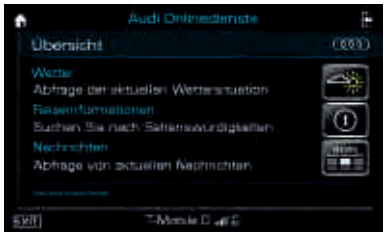
Follow your intuition –
it will get you to the right destination.

Our claim of “Vorsprung durch Technik” is one that we are trying to fulfil in every part of an Audi – as demonstrated by the Multi Media Interface (MMI®) which has undergone further development. The MMI is used to operate a number of in-car media, the navigation system and other comfort functions.

Until now, the MMI has been easy to use – but the new MMI® navigation plus makes it even easier, with a reduced number of buttons for a better overview. All six so-called hard keys, for telephone or navigation functions for example, are located around the central rotary/push-button control – for intuitive operation. The buttons for radio and media are logically located close to the volume control. In conjunction with Bluetooth car phone online, you have Google Earth images available for navigation, amongst other things. The Google point-of-interest search will take you to restaurants, sites or other places that might be particularly interesting for you. And on request, Digital Audi Broadcasting reception (DAB) guarantees even more music enjoyment.

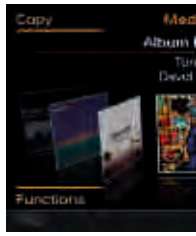
By the way, you can make all your navigation system entries by voice control, leaving you more relaxed when you reach your destination.

Traffic information online: with detailed traffic flow information on the navigation map, faster information about traffic jam build-up and clearance, greater cover of the road network (e.g. including major A and B roads)



Travel information/weather and news online: with Audi connect you can keep up-to-date with information even when on the road. Renowned national and international editors provide texts and images on topical subjects. And providing the respective supplier supports the feature, the news is outputted in the selected language in the MMI navigation plus.

Navigation/Google search: a UMTS module is used to navigate on the basis of true-to-life Google Earth images. High-resolution aerial and satellite images make orientation quite simple. Google point-of-interest search can be used with voice control for plain text and keyword searches, providing you with detailed tips about your destination. Using myAudi or Google Maps you can prepare your very own navigation destinations on your PC at home and send these to your vehicle. When you start your journey, they are loaded into the MMI® navigation plus.



Online at all times with Audi connect.

Even on the road.

Mobile information services: the ultimate connection. Straight from the Internet: use Audi connect to search for any special destinations in the MMI® using Google, request the latest news and the current weather forecast for your destination. Data transfer is handled via the UMTS module of the Bluetooth car phone online, which can be ordered as an option for the MMI® navigation plus. The WiFi hotspot is a world first and can be fitted ex-factory if required. You can request important information, data and e-mails using your laptop, iPad or netbook as conveniently as if you were in the office. Communication with the Internet takes place via a vehicle-specific UMTS module through the roof aerial.

Because they protect something very valuable,

you will find our most outstanding employees working in the area of vehicle safety.

The development of a new vehicle includes a number of crash tests. At first as virtual tests on the computer, then finally with the car itself in the halls of the Audi Vehicle Safety Department. Our engineers do not just evaluate data from their own series of tests but also data from real accidents recorded by accident researchers and scientists from the Audi Accident Research Unit (AARU).

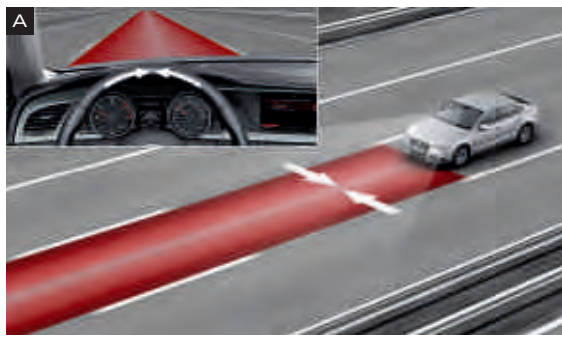
The unit was founded in 1998 and works together with the police and doctors to establish the most accurate information possible about accidents. With the help of this information, our series of tests is continually being refined.

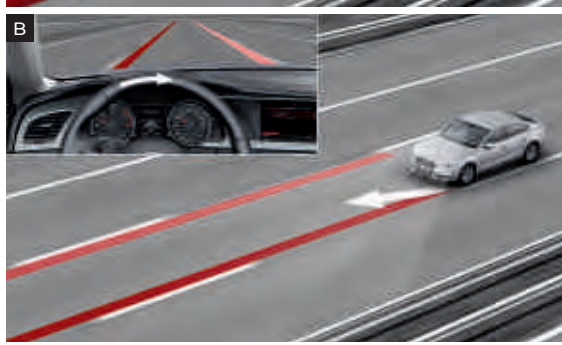
In the A5 and S5 Sportback, there are many safety features which work in concert. In the event of an accident, the engine and the fuel supply are immediately stopped, the door locking mechanism is opened and the hazard lights are activated. The interior of the vehicles is equipped with an airbag system: adaptive full-size driver and front-passenger airbag with seat position recognition function, side airbags at the front and a head airbag system are standard. The front seats are additionally equipped with belt tensioners and belt force limiters, and the special seat structure impedes slipping underneath the seat belt. The highly rigid passenger compartment made from quality steel with improved deformation qualities offers extremely good protection.

The Audi A5 not only comes with many new technical innovations but also with something extra special on request: a sort of sixth sense – or Audi pre sense. Driving situations are categorised through a radar sensor, and warning measures initiated through to collision avoidance. Audi pre sense front additionally monitors the traffic ahead via a radar sensor of the optional adaptive cruise control. In critical situations, the Audi braking guard warns the driver and reinforces braking force if necessary.

adaptive cruise control including Audi pre sense front:* within the control range from 30 to 200 km/h the automatic distance control detects vehicles driving in front within system limits using a radar sensor. The distance to the vehicle in front is maintained through automatic braking and acceleration. In addition, Audi braking guard warns the driver about an imminent collision with the vehicle in front through an extended brake assist feature. If a collision with a stationary or moving vehicle is imminent at a vehicle speed of less than 30 km/h, maximum deceleration is initiated to avoid this collision if possible.

Audi active lane assist* supports you when travelling at speeds of around 60 km/h or above, when you inadvertently drift out of your lane, for example, through inattentiveness. Before you cross over the lane marking which is detected by the camera behind the windscreen, a gentle corrective steering movement occurs. If the indicator has been activated, there is no correction. You have the choice between two system settings (steering time early [A] or late [B]). Identification of lane markings by the sensors is dependent on the weather, lighting and quality of the marking.





The lane change assistant Audi side assist* informs you from speeds of 30 km/h and above with a signal in the exterior mirror as soon as the system detects another vehicle in the adjacent lane.

Please note: the systems can only work within system limits. They can support drivers, but they are still required to be attentive at all times.

* Optional equipment.

Efficiency: standard in every Audi.

The direct route to enhanced efficiency is via innovation. For decades, Audi has been continuously providing decisive impetus for the entire automobile industry, thereby proving that effective efficiency is the result of a sustainable strategy. That's why fuel consumption and emission-reducing measures are fitted as standard to all Audi models. The extensive technologies are combined in a model-specific manner and are implemented consistently throughout the entire vehicle fleet.

The Audi Space Frame (ASF), which is used in a range of Audi models, is a milestone in the extensive experience Audi has gained with lightweight construction. With this revolutionary construction method, the weight of the body shell is reduced by about a third in comparison with conventional steel constructions. The latest innovation in lightweight construction: the weight-reducing aluminium hybrid construction used in the Audi A6.

Furthermore, with the TDI, Audi has developed one of the world's most successful diesel technologies. The combination of direct diesel injection and turbocharging provides high efficiency and excellent engine power. Current highlight: the 3.0 TDI clean diesel in the Audi A4 Saloon[1]. It already fulfils the EU6 emission standard that does not come into force in Europe until 2014.

Another highlight: the downsizing technology on the TFSI® petrol engines. Five times in succession, the 2.0-litre TFSI engine has been voted "Engine of the Year"[2]. A new evolutionary stage in efficiency is set by Audi with the Q5 hybrid quattro: as a pioneer of electrical mobility, it marks the entry into a future that will have low emission levels in the long term.

The potential of the frugal TDI and TFSI engines is brought particularly efficiently onto the road with the S tronic dual-clutch transmission with low engine speeds and shorter gearshifting times. And the aerodynamic design of the Audi bodies can contribute to an additional fuel saving through a combination of low drag and low lift.

All measures contribute towards a perfect combination of efficiency and sportiness in every Audi. Today – and also in the future. So that you can at all times feel the demand that we have always placed on ourselves: Vorsprung durch Technik.

[1] Fuel consumption in l/100 km: urban 8.7; extra-urban 5.5; combined 6.7; CO_2 emissions in g/km: combined 175.

It is the equipment that turns an Audi into your Audi.

Because nobody knows your taste as well as you do: Audi exclusive.

Each year Audi sells hundreds of thousands of vehicles. Yet they only sell yours once. How is that possible? With the quattro GmbH service, which makes your Audi unmistakeable: Audi exclusive. Paint finishes customised to your concept, fine leather, high-quality Alcantara and selected woods and trim; it is these materials and the precise workmanship which give your Audi its own unique personality. Your Audi partner and the Audi Forum Neckarsulm customisation studio await your wishes.

Audi exclusive leather upholstery and trim in Valcona leather (package 2) in cloudy grey/black with coloured seams in silver and black, inlays in Piano finish black. From quattro GmbH

Sports seats, front, with 2-colour seat cover in alabaster white/black with piping in Fine Nappa leather and coloured seam to match the seat centre sections, inlays in Piano finish black. From quattro GmbH

S line – redefining sportiness.

When you drive an Audi A5 Sportback you are making a clear declaration of your belief in sporty motoring. The S line packages allow you to enhance the athletic appearance of the Audi A5 Sportback even more: with a range of equipment that accentuates its dynamic lines, gives its interior a perceptibly sporty identity and further enhance its driving performance. Decide on a plus in sportiness.

The fuel consumption and CO_2 emission figures can be found from page 88 onwards.

S line exterior package

Front and rear bumpers, side grilles and diffuser insert
in a striking, sporty design

Side sill strips
body-coloured

Diffuser insert
painted in Platinum grey

S line logos
on the front wings and door sill trims

Chrome-plated surrounds for exhaust tailpipes
(4-cylinder models)

Front bumper and side radiator grilles
in a distinctive sporty design

Diffuser insert painted in Platinum grey

Sports seats, front, in Sprint cloth/black leather with jet grey seams

S line multifunction leather-covered sports steering wheel in 3-spoke design

Selector lever knob in perforated leather

Cast aluminium wheels in 5-double-spoke design

The model-specific standard and optional equipment can be found in the index from page 92 onwards.

Run-flat tyres
A5 Sportback: journey can be continued on a flat tyre at a speed of up to 80 km/h and for a maximum distance of 30 km, without having to change the wheel

---

Wheel bolts, anti-theft
can only be loosened with the supplied adapter

Tyre repair kit
with 12 V compressor and tyre sealant; permissible top speed 80 km/h

---

Space-saving spare wheel

Tyre pressure control display
visual and acoustic warning if the pressure drops in one or more tyres; display in the driver information system

---

Vehicle tool kit
in the luggage compartment

Jack
in the luggage compartment

Lights

xenon plus including headlight cleaning system
The headlights with durable gas discharge technology for dipped and main beam enable an intensive illumination of the road with evenness and range, in a colour resembling daylight both close-up and in the distance. The automatic-dynamic beam angle control prevents oncoming traffic from being dazzled; daytime running light strip and rear lights in LED technology with low power consumption

Daytime running lights
with separate reflectors, with xenon plus daytime running light band in homogeneous LED technology with low power consumption, integrated into the headlights

adaptive light[1]
The dynamic cornering light identifies the course of the road from the movement of the steering wheel. The headlights swivel – depending on the steering angle – towards the curve and in this way variably illuminate the course of the curve. The adaptive light is operational between speeds of approx. 10 km/h and 110 km/h. Also included is the turning light, which automatically switches on when the indicator has been engaged for a while and illuminates the new direction in which the vehicle is driving; including headlight cleaning system. (Can only be ordered in conjunction with xenon plus)

Headlights
A5 Sportback: halogen headlights utilising free-form technology with clear glass covers, electric headlight range control and parking light function, daytime running lights with separate reflectors

High-beam assist
working within system limits, it automatically detects the headlights of oncoming traffic, the rear lights of other road users and built-up areas. Depending on the traffic situation, the high beam is automatically switched on or off. The system thereby improves the driver's visibility and ensures a more relaxed drive thanks to the extra comfort and convenience. (Can only be ordered in conjunction with automatically dimming interior mirror)

Interior lighting
with delayed switch-off and contact switches on all doors; lighting for luggage compartment, driver, front-passenger and rear compartment, 2 reading lights at front, interior light at rear, illuminated make-up mirrors, ambient lighting

LED rear lights
LED brake/rear and rear number plate lights; reversing lights, fog lights and indicators have light bulbs. (Can only be ordered in conjunction with xenon plus)

Rear lights
A5 Sportback: in red, reversing lights in white, integral rear fog lights

Front fog lights
incorporated into the bumper

Lighting package
includes rear reading lights, illuminated vent controls and inside door handles, active door reflectors, entrance lighting, footwell lights front and rear, illuminated glove compartment

Headlight cleaning system
uses water and high pressure, for better illumination, less scatter and good visibility

Light/rain sensor
for controlling the automatic headlights, the coming home/leaving home function and the automatic wiper function, includes windscreen with grey colour strip along the top edge

Mirrors

Exterior mirrors with integrated LED indicator
electrically adjustable, convex, flat or aspherical mirror glass; S5 Sportback: with additional heating function

also optionally:

electrically adjustable and heated
both exterior mirrors and windscreen washer jets heated

electrically adjustable, heated and folding

electrically adjustable, heated, folding and automatically dimming on both sides

Exterior mirrors additionally with memory function if memory function for the driver's seat is ordered

Exterior mirror housings
body-coloured; S5 Sportback: in aluminium look

The model-specific standard and optional equipment can be found in the index from page 92 onwards.

Mirrors

Interior mirror
dimming

Interior mirror, automatically dimming
with light/rain sensor and windscreen with grey coloured strip; including windscreen with acoustic glazing for improved windscreen insulation and a reduction of outside noise

Roof systems

Glass tilt/slide sunroof
electrically operated, made from tinted single-glazed safety glass with infinitely adjustable sunscreen; integrated wind deflector, convenience locking/opening from outside via the central locking and the radio-operated remote control

Closing systems

Central locking
with autolock function and radio-operated remote control incorporated into the vehicle key

Radio-operated remote control
for central locking, with interior switch; incorporated into the vehicle key; with one touch of the button the system opens and locks doors, windows, tailgate and tank flap – with variable code; S5 Sportback: radio controlled key with S5 emblem

Immobiliser, electronic
incorporated in the engine control unit, automatically activated by the vehicle key

Anti-theft alarm
including interior monitoring system and tow-away protection via angle of inclination sensors, can be switched off; signal horn for monitoring doors, bonnet and tailgate, independent of vehicle electrical system

Closing systems

Convenience key
access and drive authorisation system, the key only needs to be carried with you; the engine is started and switched off via the engine start/stop button on the centre console, the vehicle is locked from outside via buttons on all door handles, the vehicle can also be opened from the tailgate

Garage door opener (HomeLink)
programmable radio-operated remote control, control button integrated in the interior lighting module; can be used to open many garage doors and exterior gates; control of safety and lighting systems possible

Fitting for Tracking Assistant
fitting for connecting a Tracking Assistant (available from Audi Genuine Accessories) that enables a stolen vehicle to be located

Ignition lock
electronic, ignition key features integrated chip, automatically stores relevant vehicle service data (mileage, chassis number and much more)

Glazing

Heat-insulating glass
green tinted, windscreen made of laminated glass

Dark-tinted windows (privacy glazing)
dark-tinted rear window and rear side windows

Rear window
heated, with timer switch

Windscreen cleaning system
2-speed operation, 4-speed adjustable intermittent wipe, flick-wipe function, automatic wash/wipe function

Further exterior equipment

Fitting for trailer towing hitch
includes the wiring to the spare wheel well, a prepared ABS control unit and adapted engine cooling. The set of parts for retrofitting is available from Audi Genuine Accessories.

Trailer towing hitch
removable and lockable, sphere bar and ball head made from forged steel, the 13-pin socket can be swivelled out of sight behind the bumper skirt; when removed, the towing device can be stored in the spare wheel well; trailer stabilisation system via ESP

High-gloss package
roof frame and window slot trim in anodised aluminium

Further exterior equipment

Audi exclusive black styling package
radiator grille frame in high-gloss black; radiator grille, licence plate holder, front fog lights trims and window slot trims in Matt black; S5 Sportback: air intake blade in Matt black and diffuser panel in Platinum grey. From quattro GmbH

Bumpers[2]
S5 Sportback: front and rear, with distinctive sporty design, body-coloured, S rear diffuser, with rear blade in aluminium look; A5 Sportback: in a striking sporty design

Audi Singleframe
radiator grille in high gloss black; S5 Sportback: in Platinum grey with chrome struts

Exhaust tailpipes
visible, single-branch design, 2 tailpipes on the left for 2.0 TDI; visible, dual-branch design, 1 tailpipe each on the left and right for 1.8 TFSI, 2.0 TFSI and 3.0 TDI; S5 Sportback: visible, dual-branch design, 2 oval tailpipes each on the left and right with polished surrounds

Rear spoiler
S5 Sportback: mounted on the tailgate

Model name/logo
model name on the tailgate, quattro logo (on quattro® models) on the radiator grille, on the tailgate and on the dashboard on the passenger side, on request the vehicle can also be supplied without the model name on the rear; S5 Sportback: S5 model name on the tailgate and the radiator grille, on the leather-covered sports steering wheel and in the rev counter; quattro logo on the dashboard on the passenger side, V6 T emblem on the front wings

Sill strips[2]
S5 Sportback: body-coloured

[1] For information on when this feature will be available, please contact your Audi partner. [2] For A5 Sportback only available in conjunction with S line exterior package.

Seats/seating comfort

Memory function for driver's seat
including electrically adjustable front seats; 2 different memory-sets for the electrically adjustable driver's seat and exterior mirrors

4-way lumbar support
electric, for driver and front-passenger seats, with horizontal and vertical adjustment

Front seats, electrically adjustable
electric adjustment for seat height, fore/aft position and seat and backrest angles, with electric 4-way lumbar support

Folding rear seat backrest
can be split and folded 1/3, 2/3 or completely

Rear seat system with 3 seats
A5 Sportback: rear seat backrest can be split and folded 1/3, 2/3 or completely; including 3rd head restraint and 3rd seat belt. (Cannot be ordered in conjunction with climate-controlled comfort seats, front)

Seat heaters, front
heats seat cushions and backrests; on sports seats or leather seats also heats the side bolsters; individually adjustable in several stages for driver and front-passenger seats

Seat heaters, front and rear*
equipment as for seat heaters, front additionally also for rear seats

Centre armrest, front
adjustable lengthways; with fold-open storage compartment and two 12 V sockets in the centre console

Centre armrest, rear
foldable

Leather-covered armrests in the door trims
for an exclusive interior look

Head restraints
height adjustable front and rear; integrated head restraints on optional S sports seats are not adjustable

ISOFIX child seat mounting for the outer rear seats
standard bracket for the practical fastening of child seats in accordance with ISO standards; compatible child seats can be obtained from your Audi partner.

ISOFIX child seat mounting for the front passenger seat
with passenger airbag deactivation switch

Steering wheels/gear levers/controls

Leather-covered sports steering wheel in 3-spoke design
A5 Sportback: with full-size airbag, adjustable for height and reach, includes leather gear lever knob or selector lever knob and gaiter

Steering wheel rim customised with Audi exclusive leather
available in all Audi exclusive colours; individual choice of colour for seams in various Audi exclusive colours. From quattro GmbH

Steering wheel rim with wooden segments
available in Walnut dark brown in 4-spoke design for leather-covered multifunction steering wheel, optionally with shift paddles. From quattro GmbH

Audi exclusive steering wheel rim with wooden segments
available in Audi exclusive woods in 4-spoke design for leather-covered multifunction steering wheel, optionally with shift paddles. From quattro GmbH

Leather-covered multifunction sports steering wheel in 3-spoke design
with full-size airbag, adjustable for height and reach, includes leather gear lever knob or selector lever knob and gaiter; for operating the basic functions of Audi navigation systems, radios, voice control system, Bluetooth interface, mobile phone fitting or car phone; models with automatic transmission optionally have shift paddles behind the steering wheel; S5 Sportback: with S5 emblem, decorative seam in contrasting colour, shift paddles in aluminium look

Controls customised with Audi exclusive leather
steering wheel rim, gear/selector lever and gear/selector lever gaiter leather-covered; available in all Audi exclusive colours; individual choice of colour for seams in various Audi exclusive colours. From quattro GmbH

The model-specific standard and optional equipment can be found in the index from page 92 onwards.

Steering wheels/gear levers/controls

Leather-covered multifunction sports steering wheel in 3-spoke design, flattened at the bottom
equipment as leather-covered multifunction sports steering wheel; models with automatic transmission optionally have shift paddles behind the steering wheel; S5 Sportback: with S5 emblem, decorative seam in contrasting colour, shift paddles in aluminium look

---

Audi exclusive gear lever knob in aluminium
A5 Sportback: for manual transmission.
From quattro GmbH

Climate control

Automatic air conditioning
with sunlight-dependent control, electronically regulates the air temperature, flow rate and distribution, with ram air control and manual recirculation mode, humidity sensor, dust and pollen filter, defroster vents for the windscreen and the side windows, key recognition

---

3-zone deluxe automatic air conditioning
with sunlight-dependent control, electronically controls the air temperature, flow rate and distribution, separate temperature distribution for driver, front-seat passenger and rear compartment, temperature and air distribution adjustable left and right in the front, control panel for setting the temperature in the rear compartment in the rear centre console, automatic recirculation mode by means of air quality sensor, front control panel features digital display, includes rain, light and humidity sensor, with combined fine-dust filter, indirect ventilation, key-coded settings

---

Auxiliary heating/ventilation
The auxiliary heating heats up the interior and frees the windows from ice, the ventilation system supplies fresh air and reduces the interior temperature; complete with timer and separate radio-operated remote control with radio feedback

Luggage securing and storage systems

Storage compartments
in the front and rear door trims with storage for drinks bottles, spectacles holder in the front interior lighting module, above the interior mirror

---

Storage package
includes storage nets on the front seat backrests, storage compartment under the front seats (if memory function for the driver's seat is fitted, only under the front-passenger seat), drinks holder in the rear centre armrest and a locking glove compartment

---

Drinks holders
in the centre console

Lashing points
4 in the luggage compartment, for attaching luggage and other objects, attachment points for the combined net

---

in the centre console in the rear; replaces the 12 V socket

Aluminium look on the interior
on the light switch, air-conditioning system, MMI rotary/push-button control, vents, mirror adjustment switch, window controls and around the gear or selector lever gaiter

MMI® and navigation systems

Audi connect
Networked mobility. The term Audi connect combines all the applications and developments that connect the Internet, the owner and the infrastructure in current and future Audi models. Audi connect creates infotainment and entertainment functions and raises the level of both automotive comfort and fun to new heights. Online information (such as navigation with point-of-interest search, Google Earth images, weather, news, Audi traffic information online) is transmitted and integrated directly into the vehicle via a UMTS module integrated in the Bluetooth car phone online and the customer's SIM card in the vehicle. The optional MMI® navigation plus facilitates the use of these Audi connect services. Thanks to a WiFi hotspot, the Internet can be accessed via a mobile end device from the rear during driving or when the vehicle is at a standstill. Important notes: online services are only available in connection with mobile phone contracts with data option and only within the range of the respective mobile networks. Additional costs can be incurred for the reception of data packages from the Internet, depending on the terms of your mobile phone contract, particularly when used abroad: because of the high data volume involved, the use of a data flat rate is strongly recommended! Please contact your mobile services provider for more detailed information. Audi connect is available in all European countries except for Turkey, Malta, Cyprus and Iceland. In Russia only in the Moscow and St. Petersburg areas. A separately charged mobile phone contract may be necessary for use of the online services and the WiFi hotspot. Please contact your mobile services provider for more detailed information. Your Audi partner can inform you about the availability of the individual Audi connect services in your vehicle.
On request, you can have your Audi fitted with a WiFi hotspot for wireless internet access in the factory. Equipping with a WiFi hotspot is optional and can only be ordered in conjunction with MMI navigation plus. Simple operation via MMI navigation plus, a leather-covered multifunction steering wheel or voice control system. The WiFi hotspot is installed if you order a Bluetooth car phone online.

MMI® navigation plus
including navigation data (hard drive), high-resolution 7-inch colour display with high-quality map display and topographical map colour, display of a lot of sightseeing information and 3D city models, choice of 3 alternative routes provided, scrolling along the route, joystick map manoeuvring function in the control button, spoken TMCpro reports, split-screen route information (manoeuvring points, points of interest on motorways, TMCpro on route), detailed junction map and lane recommendations, dynamic route guidance with TMCpro (where available), voice control system (destination entry by means of whole word input in a sentence), additional arrow display in the driver information system with colour display, 8 passive loudspeakers, total output 80 watts, radio with triple tuner and phase diversity, hard drive can also be used to store music (20 GB), MP3, WMA, AAC and MPEG-4-compatible DVD player can also be used for music and video DVDs, 2 SDHC card readers (for up to 32 GB), AUX-IN connection. The use of Audi connect services (e.g. navigation using Google Earth images, weather and news, Audi traffic information online) is possible in combination with Bluetooth car phone online. (A5 Sportback: can only be ordered in conjunction with a driver information system with colour display and a leather-covered multifunction steering wheel)

The model-specific standard and optional equipment can be found in the index from page 92 onwards.

MMI® and navigation systems

Navigation data (hard drive)
contains navigation data for the following countries (where digitised): **Europe:** Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, Montenegro, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain (including the Canary Islands), Sweden, Switzerland, UK, Ukraine, the Vatican
North America: Bahamas, Canada, Mexico, Puerto Rico, USA (including Alaska, Hawaii, Virgin Islands)
Other regions: AGCC (Abu Dhabi, Bahrain, Dubai, Kuwait, Oman, Qatar, Saudi Arabia), Australia, China, Hong Kong, Japan, Macao, Malaysia, New Zealand, Singapore, South Africa

---

MMI® navigation
including navigation data (DVD), 6.5-inch colour display with high-quality map representation and numerous detailed display options, voice control (destination entry via spelling), dynamic route guidance with TMC (where available), MP3 and WMA-compatible DVD player for navigation data (DVD), can also be used for music CDs, additional arrow display in the driver information system (S5 Sportback: with colour display), radio with triple tuner, phase diversity, 2 SDHC memory card readers (for up to 32 GB), AUX-IN connection, 8 passive loudspeakers, total output 80 watts. (A5 Sportback: can only be ordered in conjunction with a leather-covered multifunction steering wheel)

Navigation data (DVD)
contains navigation data for the following countries (where digitised): Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, Montenegro, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain (including the Canary Islands), Sweden, Switzerland, UK, Ukraine, the Vatican

Driver information system
A5 Sportback: a monochrome display provides you with information from the onboard computer, auto check system, scope of display of the MMI system, brake wear indicator at front, clock and digital speed display; the outside temperature display shows an ice crystal at temperatures under +5 °C to warn of possible black ice. The display is also used to indicate the current gear in vehicles with manual transmission. The integrated efficiency programme assists you with consumption data overviews, display of additional loads and fuel-saving tips for more economic driving; including attention assist

---

Driver information system with colour display
equipment as driver information system, plus high-resolution colour display

---

Attention assist
Part of the driver information system; the attention assist analyses driving behaviour using a range of sensors and warns the driver if anything indicates that he is starting to become inattentive. Steering movements and switch/pedal actuation are recorded and compared with the individual driving patterns of the respective driver. Attention assist warns the driver by means of a display in the driver information system and an acoustic signal. The system is active from 65 km/h and can be deactivated at any time via the car menu.

Radio and TV systems

chorus radio
with CD player, dynamic station list, 30-station memory, FM (VHF) and AM (MW, LW) reception, MMI operating concept, 6.5-inch monochrome screen, speed-dependent volume control, phase diversity, 8 passive loudspeakers, total output 80 watts; Please note: certain car menu settings cannot be made using the chorus radio.

Digital Audio Broadcasting reception (DAB)
(for concert or symphony radio as well as for the navigation systems), in addition to the range of analogue stations, programmes from digitally broadcast radio transmitters with better sound quality can be received, including DAB+ reception. In connection with MMI navigation or MMI navigation plus also reception of DMB audio, a 2nd DAB tuner permanently searches for alternative reception frequencies of the set radio station, at the same time the station is updated. Please note: reception depends on local digital network availability.

concert radio
equipment as chorus radio; plus 6.5 inch TFT colour display, SDHC card reader (up to 32 GB), both MP3, AAC and WMA-compatible, TP memo function and AUX-IN connection

---

TV reception
Reception of digitally-broadcast (DVB-T), uncoded television stations (MPEG-2 or MPEG-4 standard), DVB-T audio stations, teletext and Electronic Programme Guide (EPG). External AV-IN connection via adapter cable (available through Audi Genuine Accessories). Please note: TV reception depends on local digital network availability. No AV or TV output when driving (audio output also available when driving)

Radio and TV systems

symphony radio
equipment as concert radio, plus integrated 6-disc CD changer

---

Audi sound system
6-channel amplifier, 10 speakers including centre speaker in the dashboard and subwoofer in the spare wheel well, total output 180 watts. (Cannot be ordered in conjunction with chorus radio)

CD changer
in the glove compartment, for 6 CDs (MP3 and WMA-compatible), shock-resistant, easily accessible, without magazine, each CD can be loaded and changed individually. Music files with digital rights management (DRM) cannot be played. (Can only be ordered in conjunction with MMI navigation or MMI navigation plus)

Audi music interface
for the connection of Apple iPods from generation 4, Apple iPhone (music functionality) as well as USB storage media and MP3 players. The Audi music interface is located in the glove compartment and operated via MMI navigation plus, MMI navigation, symphony radio, concert radio or a leather-covered multifunction steering wheel. Please note: can only be used in conjunction with a special adapter cable (available from Audi Genuine Accessories). Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible MP3 players. (In conjunction with the Audi music interface, the AUX-IN connection is omitted)

Adapter cable set for Audi music interface
consisting of 2 connection cables for the connection of iPod/iPhone or data carrier/media player with USB connection (Type A); further adapter cables available from Audi Genuine Accessories; visit www.audi.com/mp3 for information on compatibility

also available as:

Adapter cable set plus
in addition to the adapter cable set for Audi music interface support for the representation of cover arts, video functions; depends on the iPod used; can only be used in conjunction with more recent iPod generations, for information on compatibility visit www.audi.com/mp3

Bang & Olufsen Sound System
surround sound reproduction via 14 high-performance speakers; 1 centre speaker and 2 midrange speakers in the dashboard; 1 tweeter in each mirror quadrant; 1 woofer in each front door; 2 tweeters and 2 low/midrange units in the rear doors; 2 surround sound speakers and 1 subwoofer in the spare wheel well, exclusive speaker covers with aluminium trim, dynamic driving noise compensation, 10-channel amplifier; total output 505 watts. The reproduction of 5.1 Surround Sound is possible in conjunction with MMI navigation plus and the integrated DVD drive. (Cannot be ordered in conjunction with chorus radio)

Telephone and communication

Bluetooth interface
Bluetooth-compatible mobile telephones can be connected to the vehicle via the interface. Hands-free calls are possible in the vehicle via the microphone; visit www.audi.com/bluetooth for information on compatibility. (Cannot be ordered in conjunction with chorus radio)

Fitting for mobile phone (Bluetooth)
comprises a hands-free facility and voice control for telephone functions as well as a fitting for optional mobile-specific charger in the centre console between driver and front-passenger seat; operation via MMI navigation plus, MMI navigation, concert radio, symphony radio, a leather-covered multifunction steering wheel or, where present, via the voice control system; please contact your Audi partner or visit www.audi.com/bluetooth for adapters and information about which mobile phones are compatible. (A5 Sportback: can only be ordered in conjunction with a leather-covered multifunction steering wheel and a navigation system or a concert or symphony radio; S5 Sportback: can only be ordered in conjunction with a navigation system or a concert or symphony radio)

The model-specific standard and optional equipment can be found in the index from page 92 onwards.

Telephone and communication

Bluetooth car phone
your Bluetooth-compatible mobile phone can be conveniently connected to the vehicle's internal GSM module (provided the mobile telephone has an SIM Access profile), additional SIM card reader located in the surround of the MMI navigation. Transfer of phone book entries to the vehicle and management of call lists; simple operation using MMI navigation, leather-covered multifunction steering wheel or voice control system; for information on compatibility visit www.audi.com/bluetooth. (Can only be ordered in conjunction with MMI navigation)

Bluetooth car phone online
your Bluetooth-compatible mobile phone can be conveniently connected to the vehicle's internal UMTS module (provided the mobile telephone has an SIM Access profile); additional SIM card reader in the surround of the MMI navigation plus. Transfer of phone book entries to the vehicle and management of call lists. Audi connect services allow additional online services such as point of interest search, navigation with the aid of Google Earth images, convenient route planning and destination entry using myAudi or Google Maps, information services e.g. weather and news, Audi traffic information online with detailed traffic flow information on the navigation map, quicker information on traffic jam build-up and clearance, greater coverage of the road network (e.g. national and rural roadways), WiFi hotspot for internet access for passengers in the rear passenger compartment using their mobile end device (e.g. laptop). Because of the high data volumes (currently concerns in particular navigation with the aid of Google Earth images and WiFi hotspot), a mobile phone contract including a data flat rate is strongly recommended! Online services are only available for mobile phone contracts including a data option and only within the coverage of the mobile phone network; they are only offered in Europe (in Russia only in the Moscow and St. Petersburg areas; not in Turkey, Cyprus, Malta and Iceland); there will be additional costs for the use of these services (charges and billing correspond to the personal mobile phone contract); The content and scope of the online-based services offered may vary. Simple operation via the MMI navigation plus, a leather-covered multifunction steering wheel or the voice control system; for information on compatibility visit www.audi.com/bluetooth. (Can only be ordered in conjunction with MMI navigation plus)

Handset for the Bluetooth car phone and Bluetooth car phone online
with colour display and integrated SIM card reader, for making private calls; texts can be easily written thanks to automatic word recognition. Handset is stored in the centre armrest at the front

*For information on when this feature will be available, please contact your Audi partner.

Assistance systems

Parking system plus with reversing camera*
acoustic and visual parking system for front and rear, image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent); includes help lines and guidelines and identification of point at which to apply opposite lock when parallel parking, reversing camera concealed in the handle strip of the tailgate. (Can only be ordered in conjunction with a navigation system)

Parking system, rear
makes reverse parking easier by indicating acoustically how far away the vehicle is from a detected object; measurement is by ultrasonic sensors concealed in the bumper

---

Parking system plus
acoustic and visual parking system for the front and rear with MMI display; measurement is by ultrasonic sensors concealed in the bumpers. (Cannot be ordered in conjunction with chorus radio)

Hold assist
holds the vehicle stationary for unlimited periods after stopping, on almost every uphill and downhill gradient. The system is activated by push-button and allows the driver to drive away easily and comfortably without having to operate the electromechanical parking brake.

---

cruise control
at speeds of 30 km/h and above, the system keeps the set speed constant, provided that engine power and engine braking effect permit it, also features active braking intervention, e.g. when driving downhill, operated via separate steering column stalk; set speed displayed in the driver information system

---

adaptive cruise control
automatic distance control (control range 30 – 200 km/h); working within system limits, it uses a radar sensor to detect vehicles ahead and maintain this distance by automatic braking and accelerating; 4 distance levels and different driving modes can be selected individually; including Audi pre sense front: Audi braking guard warns the driver through an enhanced brake assist of any imminent threat of collision with the vehicle in front; extended by the function of maximum deceleration: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to avoid this collision if possible. (Cannot be ordered in conjunction with chorus radio)

Assistance systems

Audi side assist
lane changing assistant, working within system limits at speeds of 30 km/h and above, the system uses radar technology to monitor the area on the left, right and behind the moving vehicle and informs or warns the driver by means of an LED display in the exterior mirror if the Audi side assist has detected another vehicle assessed as critical for lane-changing. (Cannot be ordered in conjunction with chorus radio)

Audi active lane assist
lane compliance assistant, supports the driver within system limits comfortably in keeping in the lane (operating range 60–250 km/h). If the system is activated and ready and the driver has not operated the indicators, the Audi active lane assist will guide the vehicle within recognised lane boundary lines by means of gentle, corrective steering intervention; the driver can choose whether he would like to be monitored continuously or just shortly before crossing the traffic lane marker (choice of earlier or later steering time); additional steering vibration can be adjusted if the driver wishes. (Can only be ordered in conjunction with high-beam assist, and cannot be ordered in conjunction with chorus radio)

Assistance package
The assistance package contains the functions of the following assistance systems: parking system plus (upgrade possibility for parking system plus with reversing camera), Audi active lane assist, adaptive cruise control

Suspensions/brakes

Audi drive select
changes vehicle characteristics e.g. by adapting power steering assistance, accelerator and gearshift characteristics; the system also influences other optional equipment; available modes: comfort, auto, dynamic and – in conjunction with an MMI navigation system – individual. All models also have the efficiency mode, which shifts the engine, transmission, optional adaptive cruise control and climate control in a consumption-improved basic setting.

Dynamic steering*
when changing lanes, parking and cornering, this system improves comfort and handling by dynamically regulating steering according to the driving situation. In addition to adaptation of the steering effort (as with the electromechanical servotronic), the steering angle is also adapted (steering ratio). The system is also supported further by vehicle stabilisation through ESP. (Can only be ordered in conjunction with Audi drive select)

Suspension with damper regulation
electronically controlled adaptation to different driving situations; dynamic or comfort-oriented characteristic of the damper coordination can be adapted via Audi drive select; S5 Sportback: on the basis of the S sports suspension. (Can only be ordered in conjunction with Audi drive select)

Dynamic suspension
A5 Sportback: providing outstanding handling and exceptional levels of driving comfort with 5-link lightweight front axle with virtual steering axis, tubular anti-roll bar; trapezoidal-link rear axle with independent wheel suspension; twin-tube gas-filled shock absorbers and coil springs, auxiliary rebound springs, flexibly mounted subframe at rear, at front rigidly bolted to vehicle body

Sports suspension
A5 Sportback: with stiffer spring and damper tuning for more direct contact with the road and sporty handling

S line sports suspension
A5 Sportback: with more dynamic suspension tuning and vehicle lowered by 10 mm

S sports suspension
S5 Sportback: with stiffer spring and damper tuning for more direct contact with the road and sporty handling; 5-link lightweight front axle, twin-tube gas-filled shock absorbers and coil springs, trapezoidal-link rear axle with independent wheel suspension, front axle carrier rigidly fixed to the bodywork, flexibly mounted axle supports at rear

Braking system
dual-circuit braking system with diagonally split braking system, anti-lock braking system (ABS) with electronic brake force distribution (EBD), Electronic Stabilisation Programme (ESP) with brake assist, tandem brake booster, disc brakes at the front/rear, ventilated at the front; S5 Sportback: high-performance brake system with internally ventilated brake discs on front and rear axles

Brake callipers
S5 Sportback: painted black, front callipers with S5 emblem

Electromechanical parking brake
includes parking brake function when stationary, drive-off assistance function through automatic release when driving away and emergency braking function whilst driving acting on all 4 wheels

Technology/safety

Airbags
adaptive front-end collision protection with seat position recognition and full-size airbag for driver and front passenger; side airbags at front (thorax/pelvis airbags); head airbag system

Side airbags, rear
supplement the side-on collision protection in the doors (thorax/pelvis airbags)

Head airbag system
unfolds over the entire length of the side windows in the area of the 1st and 2nd row of seats and protects the passengers in the front and rear seats in the event of a side impact

Integrated head restraint system
In the event of a rear-end collision, the design of the seats stabilises the upper torso and provides better support for the head. This increases the level of protection and reduces the risk of a whiplash injury

Body, galvanised
fully-galvanised in areas at risk from corrosion, unitary construction, welded to the floor pan, front and rear areas feature defined crumple zones, aluminium front wings. (12 year warranty against rust perforation)

Instrument cluster
with adjustable lighting, electronic speedometer with odometer and trip odometer, rev counter and automatic ready-check when engine starts, radio-controlled clock (GPS clock in conjunction with MMI navigation plus), coolant temperature display and fuel gauge; S5 Sportback: with S-specific grey dials, white needles, S5 emblem in the rev counter

The model-specific standard and optional equipment can be found in the index from page 92 onwards.

Technology/safety

Safety steering column
includes a shunt mechanism with damping function to supplement the protection offered by the seat belts and airbags

Seat belts
3-point inertia reel seat belts for all 4 or 5 seats, with belt force limiters, belt tensioners and front seat-belt reminder, colour-coordinated with the interior

Warning triangle
with bracket on the inside of the tailgate

First-aid kit
in the storage compartment in the rear centre armrest

Traction control ASR
for good traction, reduces the spinning of the drive wheels

Electronic Differential Lock EDL
On surfaces with varying levels of grip, this start-off assistant automatically brakes the drive wheels on any surface that is too slippery, thereby ensuring smooth, powerful progress; operates at speeds up to approx. 100 km/h.

Electronic Stabilisation Programme ESP
networks the ABS, EBD, ASR and EDL with its own sensors and compares the driving data with reference data; provides better stability at all speeds by targeted braking of individual wheels and intervention in the engine management system

ESP with electronic cross-axle lock
A5 Sportback: the electronic cross-axle locking function is incorporated into the ESP on front-wheel drive models. It distributes the drive torque by means of targeted braking actions, depending on the driving situation. When cornering, the cross-axle lock actively counteracts understeer. The result is improved traction and dynamic performance when cornering and more precise and neutral handling (less understeer). Agility during steering is also improved.

Electromechanical power steering system
maintenance-free rack & pinion steering with speed-dependent servo assistance; precise steering feel at high speeds, excellent assistance when parking

Manual transmission
A5 Sportback: 6-speed, all-synchromesh, hydraulically-actuated dry clutch with asbestos-free linings, 2-mass flywheel

multitronic
the multitronic generation of continuously variable transmissions, featuring dynamic gear control program (DCP) and sport program; 8 different gears can be selected in manual mode; hydraulically controlled multi-plate clutch (available for models with front-wheel drive)

S tronic
(available for models with quattro® permanent all-wheel drive), the 7-speed dual clutch transmission with electro-hydraulic actuation facilitates shorter gearshift times and gearshifting with hardly any perceptible break in propulsive power; can be operated via the shift paddles behind the steering wheel (optional, standard for S5 Sportback) or the gear lever, in automatic mode the driver can choose between 2 programs D (normal) and S (sport).

Front-wheel drive
A5 Sportback

quattro®
permanent all-wheel drive with asymmetric/dynamic torque distribution, self-locking centre differential with wheel-selective torque distribution, distributes the driving forces depending on the driving situation to each individual wheel for precisely controlled handling

quattro® with sports differential
The electronically controlled sports differential distributes variable amounts of driving force to each wheel and ensures outstanding acceleration performance in corners and stabilises the vehicle's response to load change; it also improves direct steering characteristics and provides more agile handling due to the lower steering effort required. A5 Sportback: only available for 3.0 TDI

Recuperation
Increasing the generator voltage converts kinetic energy into usable electrical energy when the vehicle is coasting or braking. This energy is then used to assist the generator during subsequent acceleration, saving up to 3 % fuel.

Start-stop system
helps to reduce fuel consumption and CO_2 emissions by switching off the engine in stationary phases, e.g. at traffic lights. The starting process is initiated as soon as the driver presses the clutch or releases the foot brake for the vehicle to move off again.

Misfuelling protection
mechanically prevents incorrect fuelling of diesel vehicles with petrol

Audi extended warranty

Audi extended warranty
can only be ordered directly and on purchase of a new car; is a consistent continuation of the manufacturer's guarantee so that you are protected against risk and can control servicing costs even after the first 2 years. There is a total of 9 lifetime/total mileage combinations to choose from:

Additional 1 year Audi extended warranty, maximum total mileage 30,000 km

Additional 1 year Audi extended warranty, maximum total mileage 60,000 km

Additional 1 year Audi extended warranty, maximum total mileage 90,000 km

Additional 2 years Audi extended warranty, maximum total mileage 40,000 km

Additional 2 years Audi extended warranty, maximum total mileage 80,000 km

Additional 2 years Audi extended warranty, maximum total mileage 120,000 km

Additional 3 years Audi extended warranty, maximum total mileage 50,000 km

Additional 3 years Audi extended warranty, maximum total mileage 100,000 km

Additional 3 years Audi extended warranty, maximum total mileage 150,000 km

*For information on when this feature will be available, please contact your Audi partner.

Audi Genuine Accessories: your decision in favour of more individuality.

Have you been able to decide between two excellent vehicles? No matter which of the two you will be driving in the near future – A5 Sportback or S5 Sportback – both already have their quite distinctive style. They are only missing one little thing: your personality. The following pages will show you a few of the options available for turning your Audi into the car that meets your requirements. Audi Genuine Accessories are made to match the respective model in design and functionality, enabling you to add your own very personal touches.

Detailed information can be obtained from the Audi A5 accessories catalogue, at **www.audi.com**, and from your Audi partner.

1

1 Cycle fork mount
Convenient. Lockable. Suitable for cycles with a quick-action lock on the front wheel. Maximum load 17 kg. (Can only be used in conjunction with the carrier unit).

2 Audi Tracking Assistant and Audi Tracking Assistant plus[1]
Enable location and tracking of a stolen vehicle via GPS/GSM technology in 27 European countries. Available in 2 variants. Audi Tracking Assistant plus with automatic driver recognition and intelligent restart inhibitor.

3 Audi Entertainment mobile[2]
The Rear Seat Entertainment of the 2nd generation is a 9-inch screen with integrated DVD player for installation on the front seat backrests. Excellent image quality thanks to digital high resolution screen, high functionality and numerous connection options, e.g. the separately available Bluetooth headset. With the new holder for mobile end devices, it is easy to attach and can also be used outside the vehicle. Not available for the Audi S5.

4 Luggage box (370 l)
The compact box is ideal for the secure storage of your luggage. It is easy to open, can be locked and is easy to clean. Its aerodynamic form helps to reduce wind noise better. (Can only be used in conjunction with the carrier unit).

5 Cast aluminium winter wheels in 5-arm design
Complete winter wheels in size 7.5 J x 17 for 225/50 R 17 tyres, can be fitted with snow chains. You can find further wheels in different designs, including summer wheels, in the special accessories catalogue.

6 Snow chains
For improved grip on snow and ice. To fit wheel size 225/50 R 17, for example.

7 Audi child seat youngster plus
The seat offers excellent comfort thanks to intelligent belt guidance. The backrest is adjustable in height and width. Adaptations can be made via a viewing window for size adjustment. Suitable for children from 15 to 36 kg (approximately 3½ to 12 years). The Audi baby seat is available for babies up to 13 kg, and the Audi child seat youngster for children up to 18 kg. The washable covers are available in silver/black and signal orange/black.

[1] For more detailed information, please contact your Audi partner. [2] Condition: fitting for Rear Seat Entertainment in the vehicle.

Emission standard		EU5

[ ] Data for S tronic.

Notes

[1] The figure stated was calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).

[2] Weight of car, unladen, with driver (68 kg), luggage (7 kg) and with fuel tank filled to 90 %, calculated in accordance with the current version of Directive 92/21/EEC. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.

[3] The engine's power output always decreases with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10 % from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.

[4] A vehicle's fuel consumption and CO_2 emissions do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO_2 is the greenhouse gas primarily responsible for global warming.

[5] Regulated.

[6] We recommend using sulphur-free super unleaded RON 95 in accordance with DIN EN 228. If not available, use sulphur-free regular unleaded RON 91 in accordance with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel in accordance with 692/2008/EC.

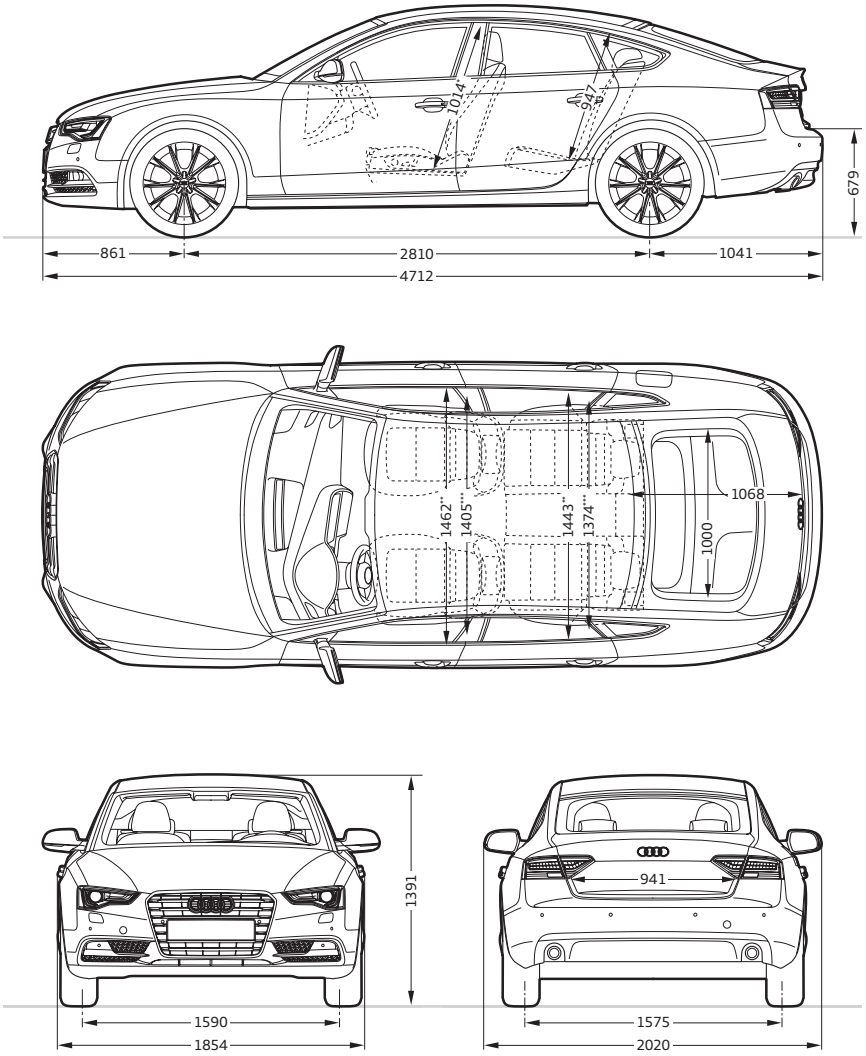
[7] We recommend using sulphur-free diesel in accordance with DIN EN 590. If not available, use diesel in accordance with DIN EN 590.

[8] The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.

Important note

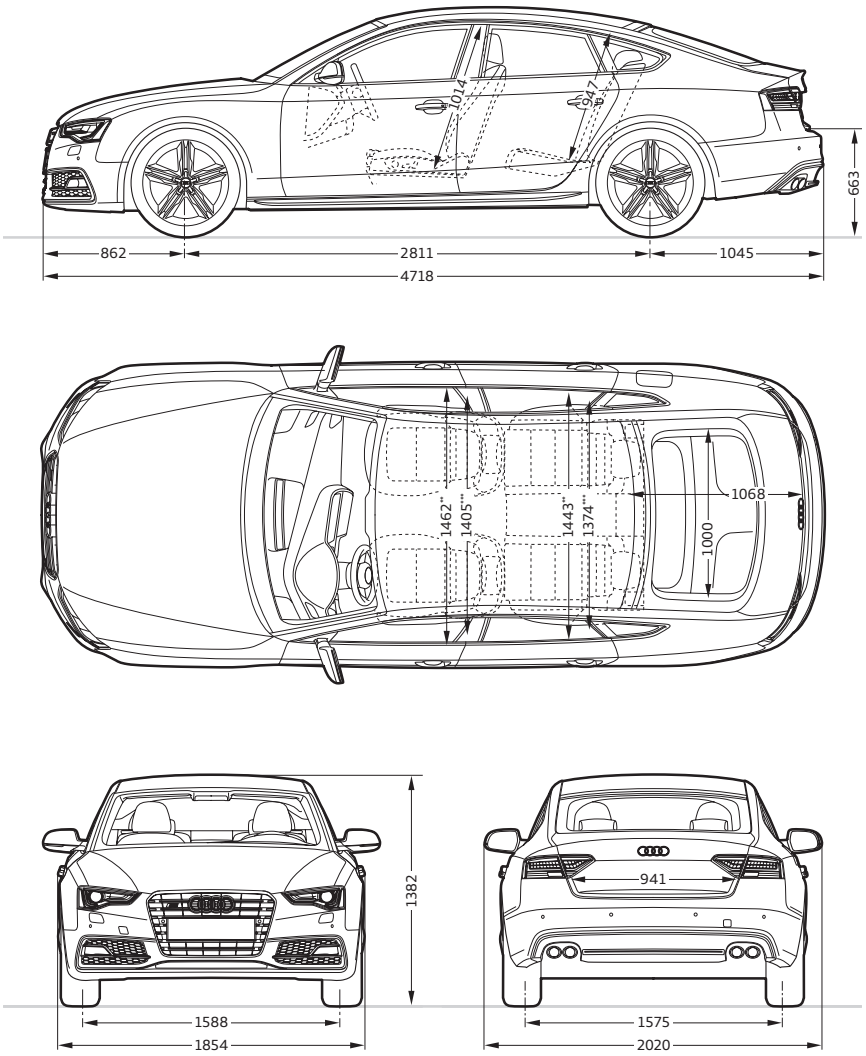
Inspections are due as shown by the service display.

Audi A5 Sportback



Dimensions in millimetres.
Dimensions are for vehicle at unladen weight.
Luggage compartment volume 480/1,283 l (measured by the VDA method, using 200 x 100 x 50 mm blocks; second value with rear seat back folded down and vehicle loaded up to the rear parcel shelf).
Turning circle approx. 11.5 m.
*Maximum headroom. **Elbow room width. ***Shoulder room width.

Audi S5 Sportback



Dimensions in millimetres.
Dimensions are for vehicle at unladen weight.
Luggage compartment volume 480/1,283 l (measured by the VDA method, using 200 x 100 x 50 mm blocks; second value with rear seat back folded down and vehicle loaded up to the rear parcel shelf).
Turning circle approx. 11.5 m.
*Maximum headroom. **Elbow room width. ***Shoulder room width.
